

Metabolic Insights CEO Job Posting

Metabolic Insights is a new disrupter in the health space. We are on a mission to provide people with information about themselves that has never been available before. We are taking 'Quantified Me' to a new level.

We are creating a rapid, Point-of-Care platform technology that detects and measures proteins in saliva. We have demonstrated the use of the technology for measuring insulin and the Covid-19 virus in saliva. There is huge potential for other applications in health and wellness as well oncology, cardiovascular disease, infectious diseases, and concussion management.

Our first goal is to help millions of people around the world to lose weight or to maintain their desired weight. Quickly quantifying salivary insulin will allow consumers to understand how nutrition and other lifestyle factors are affecting their metabolism and will answer the question: am I currently storing fat or burning fat?

We are seeking an ambitious, curious, business-oriented and science-loving, driven CEO to create a billion-dollar company. This position reports to the board.

Experience Required

- Prior experience as medical device CEO of a startup (10+ people)
- Track record in angel and venture capital fund raising
- Track record in raising non-dilutive government funding
- Experience commercializing medical products/devices
- An entrepreneurial mindset with outstanding organizational and leadership skills
- Strong understanding of corporate governance and performance management principles and best practices

Experience Preferred

- A successful exit from a medical device company(s)
- PhD / Masters Degree in Electrochemistry / Biochemistry
- Knowledge of Potentiostats, Electrode Development, Assay Development, Production, Product Development
- Ideally based in BC
